

Ahmed Jarral

BSc Optometry

Optometrist

About

Ahmed Jarral has been qualified for over 4 years, after starting his journey in a large practice/multiple. Having LASIK with Optical Express in September 2021 prompted him to look into refractive optometry. Since joining the business, he has progressed as a clinician, more than he could ever had imagined.

Working alongside skilled clinicians, ophthalmologists/surgeons, dealing with surgery complications, being exposed to ocular manifestations that one wouldn't normally find in a standard high street practice, has brought a huge amount of satisfaction to his career. He definitely feels like he's making a difference! He is now looking to finish his IP training to then progress to other areas within the company.
